EXPERIENCE

Facebook AI, Menlo Park, United States   2020/06-2020/08
Research Intern in Personalization Team
- Design a user model for large-scale recommendation system. By modeling active and inactive users in different ways, the overall user model is simple yet effective, achieving at least 7% improvement on two largest benchmark datasets that contain billions of user-item interaction data.
- This work is submitted to a top ML conference and is under review.

Ant Financial (subsidiary of Alibaba), Hangzhou, China   2018/06-2018/08
Research Intern in AI Department
- Worked on financial news recommendation
- A Part of the ICML 2019 paper for recommendation system
